Outgrowing VSS?

Get Version Control Software On Demand with SourceAnywhere Hosted™

Dynamsoft SourceAnywhere Hosted™ is the ultimate hosted VSS replacement for growing, distributed software development teams.

- Improves team productivity by outperforming VSS in speed, security, scalability and reliability.

- Is delivered over the Internet as a 'Software as a Service' (SaaS) application. The SaaS model dramatically reduces the costs of software installation, maintenance and support.

- Simplifies your IT infrastructure. Dynamsoft hosts, manages and maintains the application so you can concentrate on building software, not on system maintenance.

- Available on the Web from any location 24/7.

Why **Software as a Service** for Version Control?

"More than 75% of IT budgets are spent just maintaining and running existing systems and software infrastructure."
~ **Gartner**

"The initial [software] purchase is usually only 5% of the total cost of owning and maintaining a program."

~ **Microsoft** in The Wall Street Journal

Dynamsoft™

Free Hosting Plan is available

◇ Why Replace VSS with SourceAnywhere Hosted?

- **Reduce costs** - The SaaS delivery model significantly reduces the total cost of software ownership. As a SourceAnywhere Hosted subscriber, maintenance, back-ups, upgrades, and more are included in a single, monthly subscription fee.

- **Get a fully managed service** - Dynamsoft manages back-ups, maintenance, security, technical support and disaster recovery. The solution is hosted in a fully redundant Primus data center to guarantee high availability.

- **A familiar user experience** - The interface closely resembles the VSS user interface, making for an easy transition.

Dynamsoft™

- **Highly reliable** - SourceAnywhere Hosted stores all repositories on Microsoft SQL Server to ensure data integrity.

- **High performance and scalability** - Whether you work with a small group or a large development team, SourceAnywhere Hosted scales to meet your needs.

- **Anytime/anywhere availability** - Accessible 24/7 for developers working in every time zone.

- **Advanced security** - SourceAnywhere Hosted supports 128-bit SSL encryption and a comprehensive password policy.

- **Cross platform and IDE integration** - SourceAnywhere Hosted works with Windows plus Linux, Max, HP UX, Solaris or any Java compatible platform. It also supports IDE integration with Visual Studio, Visual Studio .NET, Eclipse and Macromedia.

Lower Costs and Improve Productivity with SourceAnywhere Hosted

- Faster, more secure and reliable version control solution than VSS.

- SaaS model cuts software costs. No need to invest in expensive IT infrastructure.

- Remote development teams can log in to SourceAnywhere Hosted anytime from anywhere in the world.

- No upkeep hassles because Dynamsoft looks after application maintenance, back-ups, security, technical support and disaster recovery.

- Your team can focus on what it does best—developing software, not managing its version control.
